EXPERIENCE

Yhills

Mar 2024 – May 2024

Frontend Developer Intern

Remote

- Engineered a responsive, mobile-first blog platform using HTML5, CSS3, and JavaScript, ensuring seamless cross-browser rendering and layout consistency.
- Reduced merge conflicts by 20% across team workflows by establishing standardized Git branching models and structured PR code review guidelines.
- Adopted structured Git branching workflows and PR code reviews, reducing merge conflicts by 20% across team deployments.
- Collaborated in an Agile environment to optimize component state management and REST API integration, cutting UI bug reports by 15%.

PROJECTS

Comics AI - AI-Powered Webcomic Discovery Platform | React, Node.js, Express.js, PostgreSQL, Prisma, Gemini API

- Architected and deployed a full-stack AI discovery engine using React, Node.js, Express, and PostgreSQL, serving personalized webcomic recommendations in real time.
- Designed prompt-engineering workflows utilizing the Google Gemini API to parse dynamic user interest profiles into high-accuracy context recommendations.
- Implemented a production-grade database layer using Prisma ORM and Neon PostgreSQL, hosted on Vercel (frontend) and Render (backend) with cross-origin handling.

Starune - Live Stargazing Forecast App | React, Vite, Tailwind CSS, Node.js

- Engineered a real-time stargazing condition calculator using React, Vite, and Node.js, delivering instant, location-specific visibility metrics.
- Optimized API query latency by batching and caching asynchronous requests to OpenWeatherMap and OpenStreetMap, preventing redundant network overhead.
- Deployed backend services on Render, driving 250+ organic page views during initial launch through targeted community distribution.

Taskly - Collaborative Task Management App | React, Tailwind CSS, Supabase

- Built a multi-tenant task management app leveraging React, Tailwind CSS, and Supabase with row-level security (RLS) for isolated user data access.
- Cut database query redundancy by 20% by optimizing PostgreSQL CRUD operations and state-sync mechanisms in Supabase.
- Implemented client-side routing and animated UI transitions deployed on Vercel, ensuring zero page-reload latency across dashboard navigation.
