@ Yhills

- Engineered a responsive blog platform using **HTML, CSS, and JavaScript**, ensuring consistent UI/UX across devices.
- Adopted structured **Git branching and PR review practices**, reducing merge conflicts by **20%**.
- Refactored UI architecture and implemented a **scalable grid system**, improving load performance by **25%** and establishing a consistent layout across pages.

PROJECTS

Comics AI - AI-Powered Webcomic Discovery Platform 🌐

- Architected and deployed** a full-stack AI-powered webcomic recommendation platform using React, Node.js, Express.js, PostgreSQL, and Prisma, integrating the Gemini API to deliver personalized comic suggestions at scale.
- Engineered sophisticated prompt-based AI workflows** that translated nuanced user preferences into context-aware, relevant recommendations via the Google Gemini API.
- Orchestrated a scalable, production-ready architecture** spanning REST APIs, Prisma ORM, and Neon PostgreSQL, deploying seamlessly across Vercel and Render for high availability.

Starune - Live Stargazing Forecast App 🌐

- Engineered a real-time stargazing forecast application** using React, Vite, Tailwind CSS, and Node.js, delivering location-aware weather recommendations for optimal viewing conditions.
- Integrated OpenWeatherMap and OpenStreetMap APIs**, optimizing request batching and caching to reduce latency and improve data-fetching efficiency.
- Deployed the backend on Render**, driving 250+ page views within the first week of launch through outreach.

Taskly - Collaborative Task Management App 🌐

- Developed a full-stack project management application** using React, Tailwind CSS, and Supabase, featuring secure authentication and user-scoped data isolation.
- Architected CRUD workflows** for projects and tasks backed by PostgreSQL, cutting redundant database operations by 20% and improving overall data efficiency.
- Refined responsive UI and client-side routing**, deploying on Vercel to deliver seamless navigation and an intuitive user experience.
